

SANS Comes to Bangkok Thailand Starting January 26th

SECURITY 401

SANS Security Essentials

This is your opportunity to maximize your training time and turbo-charge your career in security by learning the full SANS Security Essentials curriculum needed to qualify for the GSEC certification.

In Security 401 you will learn the language and underlying theory of computer security. At the same time you will learn the essential, up-to-the-minute knowledge and skills required for effective performance if you are given the responsibility for securing systems and/or organizations.

Visit the SANS website at: <http://www.sans.org/mentor/>

Course Location:

The Third Place Bangkok
137-137/1 Sukhumvit 63, Thonglor 10
North Klontong, Wattana, Bangkok 10110
Mobile: 081-820-8535 (Khun Poom)
Phone: 02-962-0644
Email: info@e-cq.net, Website: www.e-cq.net/giac/

Group Discounts:

SANS Mentor Program is pleased to offer two (2) or more Students who work at the same organization, a Group Discount tuition fee. To obtain the Group Discount fee and Registration Code offered for this course, contact tuition@sans.org PRIOR to registering and provide the names and e-mail addresses of all the students registering within your organization.

No single technology will meet all of an enterprise's security challenges. However, by implementing a defense in-depth strategy that includes multiple defensive measures, you can go a long way in securing your enterprise. Understanding the paths available to organizations that are considering or planning to deploy various security devices and tools such as intrusion detection systems and firewalls is just as important as knowing how to protect against these attacks.

Security 401 teaches the principles of network and wireless network security. You will learn how protocols like TCP/IP work, how to analyze network traffic and determine hostile traffic, how routers and firewalls can be used effectively, and how to create sound security policies. You'll also learn password management, including tools for password strengths on both Unix/Linux and Windows platforms. Each section in this course covers one area of technology that will play a part in a company's overall information assurance program.

SANS

SANS Mentor Program
Mentor is SANS' program for learning our courseware in ten-weekly classroom sessions right in your home town. Mentor gives you time to absorb and master the same material commonly taught at SANS six-day conferences, with the guidance of a trained network security professional. For more information on the SANS Mentor program, go to <http://www.sans.org/mentor/about.php>

SANS makes every effort to help you obtain certification.

Mentor bio

Phuong Nguyen is a security consultant offering more than 9 years of experience in the areas of information system security. He currently has more than 18 certifications, with 7 security focused certifications, including CISSP and GSEC. From time to time, he also published various security researches to help fix multiple security issues in various popular applications from corporate like Yahoo, Microsoft, and more.

Phuong is a CISSP, GSEC, SCNP, CJEH, ISSPCS, Security+ SME, Linux+ SME, CIW-SA, CIW-A, CIW-P, MCP+i, MCP, MCSE, CCNA, Network+, Server+, i-Net+, and A+.
